

PIPE SHIELD

PIPE SHIELD TECHNOLOGY

- Rehabilitates existing plumbing systems in High Rise Buildings.
- Fixes encrusted, rust corroded pipes, pinhole leaks, insufficient flow and poor water quality due to corrosion.
- Existing pipes do not need to be removed so it is not necessary to tear out walls and ceilings to access pipes.

Rehabilitates pipes ½” and larger:

- Domestic hot/cold
- Heat piping
- Process piping
- Stacks
- Vents
- Sanitary/Storm

Restores:

- Galvanized
- Lead
- Copper
- Cast Iron
- Ductile Iron
- Concrete

Process Description:

- Clean and dry existing system with compressed air and abrasives
- Apply specially formulated epoxy resin to inside surfaces.
- Assure quality in all stages with a fiber optic videoscope.

Pipe Shield Benefits:

<ul style="list-style-type: none"> • Enhanced flow capacity reduces pressure and electrical costs 	<ul style="list-style-type: none"> • Longevity: Protects against future corrosion 	<ul style="list-style-type: none"> • Quick, nondisruptive installation: reduces inconvenience to residents
<ul style="list-style-type: none"> • Improved drinking water quality 	<ul style="list-style-type: none"> • Lower cost compared to traditional repair methods 	<ul style="list-style-type: none"> • Reduced Maintenance
